ALI ASGHAR

Windsor, ON | 226-961-2210 | asghar4@uwindsor.ca | aliasghar.ca | linkedin.com/in/ali-asghar392404

EDUCATION

University of Windsor *Expected Dec 2027*

Bachelor of Computer Science (Honours Computer Science Co-op)

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Computer Networks, Theory of Computation

TECHNICAL SKILLS

Languages: Java, Python, C, SQL, VBA, JavaScript, C++, HTML, CSS

Technologies: Git, GitHub, REST APIs, OAuth, Google Cloud Console, React

Core: Data Structures & Algorithms, Object-Oriented Programming, Software Testing, Agile Methodologies, API Integration

EXPERIENCE

Software Engineer (Automation/Systems) Co-op | Linamar Corporation *Jan 2026 - September 2026*

- Developed an integrated tool-crib system from requirements through live deployment, supporting parts checkout, inventory search, and usage tracking across a manufacturing facility.
- Automated transaction logging and four-hour usage reports for management, improving reporting consistency and inventory traceability.
- Designed a maintenance parts-search interface that improved operational efficiency by ~40%.
- Completed 30+ live deployments, testing and validating features before release and iterating through Agile feedback with tool-crib staff.
- Nominated for Employee of the Month by managers for technical initiative and ownership.

Computer Solutions Advisor | Best Buy *Jul - Sep 2023*

- Diagnosed and resolved hardware, operating-system, and peripheral issues for 30+ customers per shift.
- Explained technical solutions and product trade-offs to customers with varying levels of technical experience.

PROJECTS

Buddy - AI Desktop Assistant | Python, Tkinter, REST APIs, OAuth, Whisper, GPT-4o

- Built a Windows AI desktop assistant with 10+ modular Python components to automate email, calendar scheduling, file management, camera operations, app launching, and media control.
- Integrated Gmail, Google Calendar, and Spotify REST APIs using JSON-based requests and OAuth authentication for user access.
- Implemented multilingual voice input with OpenAI Whisper and GPT-4o for real-time command interpretation across 50+ languages; won 1st Place in Automation at WinHacks 2026.

MelodyMood - Automated Spotify Playlist Generator | Python, Spotipy, REST APIs, OAuth

- Developed a Python Spotify playlist generator that creates mood-based playlists directly in users' accounts using OpenAI and Spotify REST APIs.
- Implemented OAuth authentication and JSON data handling for 30+ authenticated users through Spotipy and modular backend components.
- Collaborated in a 3-person Git-based team to define requirements, integrate APIs, and deliver features for WinHacks 2024 judging.

AWARDS & LEADERSHIP

WinHacks 2026 - 1st Place - Automation Category for Buddy AI

CS Games 2024-2026 - Represented the University of Windsor for three consecutive years

MasseyHacks 2022 & 2023 - 2x 1st Place - Hardware Category

Badminton Team Coach Mar 2024 - Present - Walkerville Collegiate Institute
